Former Clients of Scott

Any client formerly established with Scott Durrance and seen within the last six months will not have to pay the initial psychiatric evaluation fee. These clients will only pay the medication management follow-up fee of \$75.

However, to recreate your records, our initial session will be longer and approximately 30-40 minutes. To help facilitate this process please do the following:

1. Request records from previous mental health clinic. Only request the last Medication Management note and Initial Psychiatric Evaluation (IPE) that was performed by me. These will aide me greatly but if you cannot obtain that is ok. It will be easier if you can get them and bring them with you to our first appointment.
2. Bring all your meds--Medical and Psychiatric-- or an up-to-date med list. I'm good but I can't remember everything :)
3. Don't forget to talk to your insurance about your out-of-network benefits so that you know what forms you will need to fill out. It shouldn't be that bad, but the first time is always the trickiest. We will help in any way we can, but ultimately it will be your responsibility so be proactive. After the first time filing for reimbursement it will be much easier. Print my guide from the Rates & Insurances page of the website to help you ask the right questions.
4. I can't wait to see you all in the new office!!
