

Apex Psychiatric Services, LLC

SPRAVATO FEE SCHEDULE

If you are reading this and you have gone to the Spravato website, then you know that initiating treatment on Spravato is a more involved process than treatment on the most commonly used antidepressants. You probably have also come to the realization that those medications often fail to provide symptom relief in 1 out of every 3 people affected by Major Depressive Disorder. To someone with Treatment-Resistant Depression, the extra time commitment needed for initiating Spravato treatment is likely not even a concern if there is possibility of finally getting symptom relief.

The team at Apex is committed to helping people with Treatment-Resistant Depression finally get some relief from their depression symptoms. That is why we have become a Spravato treatment center. Just as initiating Spravato is a commitment of your time, it is also a large commitment of our staffing resources.

The first month of treatment entails getting the medication approved, coordinating with our pharmacy supplier for distribution, and providing 16 hours of patient monitoring by our staff (2 hours per administration 2 times a week for 4 weeks). The Second month is 8 hours of patient monitoring by our staff (2 hours per administration 1 time a week for 4 weeks). Spravato is then administered once weekly or once every 2 weeks depending on individual response. Our rates for these services are listed below. Our fees equal approximately what a specialist copay would be per visit .

Administration Fee is Just \$62.50 Per Administration as Follows:

1st Month of Treatment —**\$500**

2nd Month of Treatment —**\$250**

3rd Month of Treatment and Beyond —**\$125**

Clients may continue to see their psychiatrist or psychiatric APRN that referred them to the treatment center for Spravato treatment. However, they will still need to be evaluated for the appropriateness of Spravato through a Psychiatric Evaluation at Apex prior to starting treatment. Scheduling a consultation does not guarantee being prescribed Spravato. Clients will be required to attend a medication management follow-up appointment 1 month after initiating treatment and a minimum of every 3 months thereafter. Fees for these services are the same as our Initial Psychiatric Evaluation—**\$150** and Medication Management Follow-up appointments—**\$75**. A superbill will be provided to you after the psychiatric evaluation and medication management appointments so that you may submit it to your insurance for possible reimbursement.
